

## **Arklow Springboard Family Support Service**

Arklow Springboard Family Support Service provides a Community Based Family Support Service to parents and children who are experiencing difficulties in Arklow Town and surrounding areas. The Project is managed by County Wicklow Partnership and funded by TUSLA.

All our programmes are delivered in partnership with the parents with the aim of enabling positive change and practical solutions to presenting needs. The service offers intensive family support work to families. Families are either referred by other agencies, or can self-refer to the project.

The intensive work with families involves either family work or one-to-one work with individual members.

As well as individual work the project offers a range of group programmes such as: Parenting Programmes, Groups for children, Individual Counselling etc. All programmes are tailored to meet the presenting needs.
